KANISHKA PRAJAPAT

Ph no.- 9602223953| kanishkaprajapatcode@gmail.com| LinkedIn | GitHub

EDUCATION

VIT Bhopal University |Bhopal, Madhya Pradesh **Sept 2022- July 2026**
Bachelor of Technology (Computer Science Engineering with specialization in Gaming Technology) **CGPA- 8.86/10**
Our Lady of Pillar Convent School CBSE | Jodhpur, India **April 2018- June 2021**
Higher Secondary Grades: 89.8%, *Matriculation Grades:* 92% Stream: Science (Math) with Computer Science

SKILLS

Programming languages: Python, Java, MySQL, HTML, CSS, JavaScript
Others: Power Bi, Tableau, AWS, Blender, Unity
Languages: English, Hindi

PROJECTS

Sentiment Analysis – NLP-Based Emotion and Sentiment Classifier **March 2025-April 2025**

- Developed a machine learning pipeline for classifying sentiment and emotions using over 10,000 text samples using Python.
- Implemented NLP techniques (tokenization, lemmatization, stopword removal) and used TF-IDF & Count Vectorizer for feature extraction.
- Evaluated multiple models (Logistic Regression, SVM, Random Forest, Naive Bayes), achieving up to 90% accuracy and improving performance by 15%
- Conducted hyperparameter tuning with GridSearchCV, reducing error rates by 10%
- Visualized key patterns in emotion/sentiment distribution using Matplotlib and Seaborn.
- **Tools& Technologies:** Python, NLTK, scikit-learn, Pandas, Seaborn, Matplotlib

.

Farm Fusion: **Sept 2024-April 2025**
ML-powered platform for crop recommendation, plant disease detection, and fertilizer recommendation

- Designed the fertilizer recommendation module by selecting models, evaluating performance, and integrating with backend service.
- Constructed and validated custom datasets and evaluation pipelines, ensuring real-world effectiveness across 7+ crop-soil parameters.
- Implemented XGBoost and KNN to build and compare models.
- Achieved 90%+ accuracy in fertilizer prediction by fine-tuning models and validating against diverse soil and crop inputs.
- Documented RESTful API endpoints to support seamless integration with web and mobile platforms.
- **Tools & Technologies**: Python, scikit-learn, Flask.

Zombie Apocalypse: An Immersive Survival Tale Game **July 2024-Sept 2024 Role:**
Visual Designer & Game Environment Developer

- Designed and developed immersive 3D environments and 100+ visual assets for a horror game built on Unity.
- Optimized environmental design to improve player engagement resulting in a 20% increase in playtest satisfaction scores.
- Prepared comprehensive documentation for the game development process including asset workflows and game design decisions.
- Contributed to the successful acceptance of the project paper at ICIPDIMS 2024, NIT Rourkela.
- Tools & Technologies: C# language, Unity, Blender

Redesigning of Hearing aids **Feb 2024-March 2024**

- Revamped the design of hearing aids by integrating dual microprocessors and SOS safety features, reducing size by 40% and enhancing usability.
- Added features like Acoustic feedback and used Tin-Silicon alloy casing to lower production costs by 20%.
- The design is currently in the process of filing for a design patent.
- Aimed at making hearing aids more affordable, discreet, and user-friendly.

CERTIFICATIONS/EXTRACURRICULAR

- **Data Science with Python Certification –***iamneo*
- **Probelm Solving Skills:** *Solved 250+ problems on platforms like GeeksforGeeks and LeetCode.*
- **Data Structures and Algorithms- Java –***Apna College*
- **Hackathon:** *Smart India Hackathon 2023 - Internal Hackathon Finalist*
- **Unnat Bharat Abhiyan| Volunteer:** *Contributed to a book donation drive, distributing 500+ books and positively impacting the education of many children.*
