KANISHKA PRAJAPAT

Ph no.- 9602223953| kanishkaprajapatcode@gmail.com| LinkedIn | GitHub

EDUCATION

VIT Bhopal University |Bhopal, Madhya Pradesh **Sept 2022- July 2026**
Bachelor of Technology (Computer Science Engineering with specialization in Gaming Technology) **CGPA- 8.86/10**
Our Lady of Pillar Convent School CBSE | Jodhpur, India **April 2018- June 2021**
Higher Secondary Grades: 89.8%, *Matriculation Grades:* 92% Stream: Science (Math) with Computer Science

SKILLS

Programming languages: Python, Java, MySQL, HTML, CSS, JavaScript
Others: Oracle Cloud, AWS, Blender, Unity
Languages: English, Hindi

PROJECTS

Sentiment Analysis – NLP-Based Emotion and Sentiment Classifier **March 2025-April 2025**

- Developed a machine learning pipeline for classifying sentiment and emotions using over 10,000 text samples using Python.
- Applied NLP techniques (tokenization, lemmatization, stopword removal) and used TF-IDF & Count Vectorizer for feature extraction.
- Trained multiple classifiers (Logistic Regression, SVM, Random Forest, Naive Bayes), achieving up to 90% accuracy.
- Visualized key patterns in emotion/sentiment distribution using Matplotlib and Seaborn.
- Conducted hyperparameter tuning with GridSearchCV.
- **Tools & Technologies:** Python, NLTK, scikit-learn, pandas, Seaborn, Matplotlib

.

Farm Fusion: **Sept 2024-April 2025**
ML-powered platform for crop recommendation, plant disease detection, and fertilizer recommendation

- Designed the fertilizer recommendation module with a focus on model selection, performance evaluation, and backend integration.
- Built and validated custom datasets and evaluation pipelines, ensuring real-world effectiveness across 7+ crop-soil parameters.
- Implemented XGBoost and KNN to build and compare models.
- Achieved 90%+ accuracy in fertilizer prediction by fine-tuning models and validating against diverse soil and crop inputs.
- Documented RESTful API endpoints and model workflow.
- **Tools & Technologies**: Python, scikit-learn, Flask.

Redesigning of Hearing aids **Feb 2024-March 2024**

- Revamped the design of hearing aids by integrating dual microprocessors and SOS safety features, reducing size by 40% and enhancing usability.
- Added features like Acoustic feedback and used Tin-Silicon alloy casing to lower production costs by 20%.
- The design is currently in the process of filing for a design patent.
- Aimed at making hearing aids more affordable, discreet, and user-friendly.

DocKnock – Revolutionizing Healthcare Accessibility **January 2024**

- Designed and built a web-based prototype to connect doctors and patients across underserved regions in India.
- Used HTML, CSS, JavaScript, Figma and MySQL(backend) to create an intuitive and responsive interface.
- Pitched the solution at SAMPURNA'23 and secured Top 3 among 250 teams in a startup event.
- Currently engaged in further refining and expanding upon the core concept to extend its reach and impact.

CERTIFICATIONS/EXTRACURRICULAR

- **Data Science with Python Certification –*iamneo***
- **Data Structures and Algorithms- Java –*Apna College***
- **Hackathon:** *Smart India Hackathon 2023 - Internal Hackathon Finalist*
- **Unnat Bharat Abhiyan| Volunteer:** *Contributed to a book donation drive, distributing 500+ books and positively impacting the education of many children.*
