

KANISHKA PRAJAPAT

Jodhpur, Rajasthan, India

kanishkaprajapatcode@gmail.com — +91 9602223953 — LinkedIn — GitHub

Education

VIT Bhopal University, Bhopal, Madhya Pradesh

Sept 2022 – July 2026

Bachelor of Technology in Computer Science Engineering (Gaming Technology)

CGPA: 8.89 / 10

Our Lady of Pillar Convent School (CBSE), Jodhpur, India

April 2018 – June 2021

Matriculation: **92%**

Higher Secondary: **89.8%** Stream: Science (Mathematics with Computer Science)

Skills

Programming Languages: Python, Java, MySQL, HTML

Tools & Technologies: Power BI, Tableau, AWS, Blender, Unity

Languages: English, Hindi

Projects

Sentiment Analysis – NLP-Based Emotion and Sentiment Classifier

March 2025 – April 2025

- Built ML pipeline on 10,000+ text samples for sentiment and emotion classification.
- Applied NLP preprocessing including tokenization, lemmatization, and stopwords removal.
- Used TF-IDF and Count Vectorizer for feature extraction.
- Evaluated Logistic Regression, SVM, Random Forest, and Naive Bayes achieving up to 90% accuracy.
- Improved performance by 15% using GridSearchCV.
- Visualized trends using Matplotlib and Seaborn.

Tools: Python, NLTK, scikit-learn, Pandas, Matplotlib, Seaborn

Farm Fusion

Sept 2024 – April 2025

ML-powered platform for crop recommendation, plant disease detection, and fertilizer recommendation

- Designed fertilizer recommendation module with backend integration.
- Built and validated datasets across 7+ crop-soil parameters.
- Compared XGBoost and KNN models achieving 90%+ accuracy.
- Documented RESTful APIs for deployment.

Tools: Python, scikit-learn, Flask

Zombie Apocalypse: An Immersive Survival Tale (Game)

July 2024 – Sept 2024

Role: Visual Designer & Game Environment Developer

- Designed 3D environments and created 100+ assets using Unity and Blender.
- Increased player satisfaction by 20% through optimized environment design.
- Documented asset workflows and design decisions.
- Paper accepted at ICIPDIMS 2024, NIT Rourkela.

Tools: C#, Unity, Blender

Redesigning of Hearing Aids

Feb 2024 – March 2024

- Redesigned devices using dual microprocessors and SOS safety features.
- Reduced size by 40% and cost by 20% using Tin-Silicon casing.
- Integrated acoustic feedback for improved usability.
- Design under patent filing process.

Certifications & Extracurricular

- Data Science with Python Certification — iamneo
- Solved 250+ problems on GeeksforGeeks and LeetCode
- Smart India Hackathon 2023 — Internal Hackathon Finalist
- Unnat Bharat Abhiyan Volunteer — Distributed 500+ books to underprivileged children
